JOINT DEGREE BY
Technical University of Munich (TUM)
National University of Singapore (NUS)

20 MONTHS FULL TIME PROGRAMME
Coursework in Singapore

PRACTICAL KNOWLEDGE
Compulsory Internship & Thesis

GLOBAL PROSPECTS
Internationally Recognized Degree

INTAKE
August Every Year

TO APPLY
Apply online from 15th October at www.tum-asia.edu.sg

1 TUM is ranked as the #1 University in Germany

8 TUM ranked #8 in the Global Employability Survey

17 17 scientists & alumni of TUM have received the Nobel Prize

50 Both TUM & NUS are in the world’s Top 50 Universities
Technical University of Munich (TUM)

Technical University of Munich (TUM) is one of Europe’s leading research universities, with around 524 professors, 10,100 academic and non-academic staff, and more than 40,000 students. Its focus areas are the engineering sciences, natural sciences, life sciences and medicine, reinforced by schools of management and education.

TUM acts as an entrepreneurial university that promotes talents and creates value for society. In that it profits from having strong partners in science and industry. It is represented worldwide with a campus in Singapore as well as offices in Beijing, Brussels, Cairo, Mumbai, and São Paulo.

Nobel Prize winners and inventors such as Rudolf Diesel and Carl von Linde have done research at TUM. In 2006 and 2012 it won recognition as a German “Excellence University.” In international rankings, TUM regularly places among the best universities in Germany.

TUM Asia

Through TUM’s unwavering commitment to the betterment of society, TUM Asia was set up in 2002 as the first academic venture abroad by a German university. Today, TUM Asia offers standalone and joint Bachelor and Master programmes in Singapore together with partner universities such as National University of Singapore (NUS), Nanyang Technological University (NTU) and Singapore Institute of Technology (SIT).

A close cooperation with key industry players helps to ensure that the curriculum stays relevant and practical to the needs of the industry. Together with the unique combination of German engineering with Asian relevance, TUM Asia’s graduates are equipped to enter both industry and research sectors on a global level. With over a decade of experience, TUM Asia continues to provide quality higher education programmes suited to the needs of the industry in Asia.

In 2015, over one thousand students have come through the doors of TUM Asia and currently ply their trades in top research institutes and companies across the globe.
TUM Asia’s Master of Science in Industrial Chemistry (MSc in IC) aims to groom future leaders in selected areas of technology. It is an enriching postgraduate course for specialist engineers in the pharmaceutical, fine & specialty chemical industries.

**COURSE OUTLINE**

<table>
<thead>
<tr>
<th>12</th>
<th>6</th>
<th>7</th>
<th>45</th>
</tr>
</thead>
<tbody>
<tr>
<td>The student has to complete 12 modules and 4 lab courses in 3 semesters (4 Core Modules, 7 Elective Modules, 1 Business &amp; Technical English Module)</td>
<td>Lab Courses (Pre-essential Chemistry, 4 Core Modules and Research Practical Course)</td>
<td>Electives of your choice, with three specialisations: 1) Catalysis and Petrochemistry 2) Building and Material Science 3) Interdisciplinary Combination</td>
<td>Contact hours for every Core, Elective Module and Lab Course</td>
</tr>
</tbody>
</table>

**JOINT DEGREE**

Conferred by Technical University of Munich (Germany) and National University of Singapore (Singapore)

**4 SEMESTERS**

Full-time research and application focused programme, inclusive of internship experience and Master Thesis writing

**INDUSTRY RELEVANCE**

Our professors are actively involved in research and cooperation projects with leading industrial companies, allowing them to base the curriculum around the latest technological trends and knowledge

**GLOBAL OPPORTUNITIES**

You are able to complete your Internship and Thesis in Singapore or anywhere in the world with a company, university or research institute and look for job opportunities globally

**Duration of the Programme: 20 months**

Module Synopsis

**Pre-essential modules**
- Business and Technical English
- Chemistry Lab Course

**Core Modules** *(Comes With Practical)*
- Organometallic and Coordination Chemistry*
- Inorganic and Material Chemistry*
- Chemical Reaction Engineering*
- Polymer and Macromolecular Chemistry*

**Elective Modules** *(Choose one area of specialization)*

**Specialization 1: Catalysis and Petrochemistry**
- Molecular and Heterogeneous Catalysis
- Petroleum and Petrochemical Processes
- Unit Operations

**Specialization 2: Building and Material Science**
- Building Chemistry and Construction Chemicals
- Material Chemistry and Engineering
- High-performance Polymers

**Specialization 3: Interdisciplinary Combination**
- One Module From Specialization 1
- One Module From Specialization 2
- One Module From Specialization 1, 2 or Elective Modules*

**Additional Elective Modules** *
- Business Administration
- Legal and Safety Aspects in Industry
- Production Planning in Industry
- Innovation and Technology Management
- Industrial Marketing
- Modern Developments in Industry
- International Intellectual Property Law

A list of modules offered by the Department of Chemistry and the Department of Chemical & Biomolecular Engineering of NUS will be made available to the students before the start of the semester. The list of available modules is subject to change.

**Internship**
**Master’s Thesis**

*Disclaimer: Elective modules available for selection are subject to availability. Unforeseen circumstances that affect the availability of the module include an insufficient number of students taking up the module and/or the unavailability of the professor. TUM Asia reserves the right to cancel or postpone the module under such circumstances.*
Admissions Information

ADMISSION CRITERIA*

• Hold a minimum 3-year Bachelor Degree in Chemical Engineering, Chemistry, or equivalent degree in other relevant disciplines
• Submit one (1) notarised copy of Official or Provisional Bachelor Degree Certificate** and one (1) notarised copy of Official or Provisional Academic Transcript**
• Submit two (2) Recommendation Letters from two (2) different Professors or Employers
• Submit one (1) Letter of Motivation that indicates the reason(s) you are interested in the programme you applied for
• Submit one (1) Curriculum Vitae / Resume
• Submit one (1) Passport-sized photograph** and one (1) Passport Biodata Page photocopy (the passport page with your personal particulars)
• TOEFL / IELTS (Required for applicants whose native tongue or medium of instruction from previous studies is not in English)
• Akademische Prüfstelle (APS) certificate (Required for applicants who hold a degree from China, Vietnam, or Mongolia)

TOEFL Requirements: 88 for the Internet-Based Test (TOEFL code: 7368)
IELTS Requirements: Overall IELTS results of at least 6.5

Important: Documents that are not in English must be translated by a certified translator

*Find out about the full application process on www.tum-asia.edu.sg/application-process

**All applicants are required to submit an additional of three (3) notarised copies of Official or Provisional Bachelor Degree Certificate, three (3) notarised copies of full, Official Academic Transcript, and three (3) passport-sized photographs when you have accepted the offer of admissions and are being matriculated into our programme

TO APPLY

Applications open 15 October. Apply online at www.tum-asia.edu.sg.

TUITION FEES

<table>
<thead>
<tr>
<th>APPLICATION FEE</th>
<th>PAYMENT OF TUITION FEES</th>
</tr>
</thead>
<tbody>
<tr>
<td>S$79 (inclusive of GST) is payable for each application per programme</td>
<td>A Total of SGD 48,150* (Actual fee split into SGD and EURO) Tuition fees includes teaching fees, examination fees, internet access on campus, laboratory expenses and cost of mandatory events. Expenses excluded from this fee and are to be borne by students include: airfare, accommodation, and living expenses. The tuition fee will be paid in 3 installments.</td>
</tr>
</tbody>
</table>

*Tuition fees are accurate as of 1 October 2017. Tuition fees are subject to revision due to currency fluctuations, at the discretion of TUM Asia. Fees quoted are inclusive of 7% Singapore’s Government Goods & Services Tax. Please refer to www.tum-asia.edu.sg/MScfees for the latest tuition fees.
Entrepreneurial Thinking and Engagement
Globalization is now an inevitable force that is here to stay. At TUM Asia, our classroom reflects this diversity with an enrolment of over 28 nationalities. This means that we foster a vibrant learning environment where the student learns not only from the textbook but also through the lives of their counterparts. Classroom ideas are synthesized across the diverse economic realities and students learn to see from multiple vantage points, creating a capacity to solve problems in creative ways. The unique 20 month joint degree equips the student with not only technical and scientific knowledge, but with an enriched curriculum composed of business and cultural modules.

Highest International Standards
You will be studying with the world’s best professors from TUM and NUS, as well as experts from the industry. Not only will the student benefit from professors who are actively involved in research, one will also receive a holistic learning experience with the engagement of local lecturers from academia and industry. Our TUM modules are covered by professors who fly in from Germany on an exclusive teaching basis, to ensure that students get the undivided attention of their lecturers.

The Industrial Chemistry course provides compelling insight into important topics of modern applied chemistry. It helps students to gain knowledge and to improve their creativity, which is of utmost importance for the future development of both society and industry. It also provides a solid basis to build upon for leadership positions that take part in shaping our future.

Prof. Dr. Fritz E. Kühn
Professor at Technical University of Munich, Head of Molecular Catalysis, TUM

The excellent academic education that tackled cutting edge topics in daily industrial business provided me with a sound understanding of how modern companies work. This unique combination equipped me with the right skills to drive value innovation in my projects.

Korwin Schelkle
Alumni, Master of Science in Industrial Chemistry
PhD Student, Spitzencluster Forum Organic Electronics

Studying at the Technical University of Munich Asia
“Talents Are Our Assets, Reputation Is Our Return”
DID YOU KNOW THAT THE CORE OF THE CHEMICAL INDUSTRY IS SHIFTING TO ASIA BY 2030?

Jurong Island: Singapore’s Dynamic Chemical Hub

Singapore’s position as a global chemicals hub has grown with the extensive development of Jurong Island - an integrated complex housing many of the world’s leading energy and chemical companies. Given Singapore’s strong track record for intellectual property rights protection, the nation is ideal for companies seeking to develop and commercialise proprietary technologies and first class manufacturing processes.

Singapore aims to be a model of sustainable development by taking the lead to address climate change concerns and global resource constraints. Solutions involve energy efficiency, emissions management, and sustainable feedstocks and technologies. A number of high impact projects to utilize Singapore’s integrated manufacturing location are being implemented.

The Chemical Industry in Asia

The current growth rate of Asia cannot be matched by any other region in the world. In the past two decades, Asia has driven the economic growth and today, almost half of the global chemical sales are owned by chemical companies from Asia. As the global economy expands towards the east, by 2035, at least half of the top 10 chemical companies will be based in Asia or the Middle East. To satisfy the demand in Asia, several European chemical companies have already shifted their activities to Asia and will continue to do so. Several key end markets have been driving the demand for chemical, such as the automotive, construction and pulp industries.

Additionally, considerably more than 50% of the worldwide building activities are taking place in Asia at the moment. Today, China alone produces 60% of the cement worldwide, followed by India. Besides building activities, both new constructions and renovations are partially associated with enormous increase in energy consumption, something which is in turn detrimental to energy efficiency and can be reduced by “intelligent materials”. The construction industry is probably the most important industry in China and India. Even other Asian countries such as Vietnam and Thailand are experiencing a construction boom with significant growth rates and infrastructure. Therefore, tomorrow’s chemical experts are required to be versatile strategists and should seize the opportunities that are lined up for the chemical industry in Asia.

Sources: A.T. Kearny, Inc., Singapore Economic Development Board

---

1. Singapore is one of the leading Energy and chemical hubs, while being home to some of the world’s largest chemical plants.
2. Singapore’s chemicals sector is a major employer, with employees having the highest skills and two times the remuneration among all manufacturing industries.
3. In the past two decades, the growth in the chemical industry has been driven by Asia.
10. Singapore has the third largest oil refinery in the world, behind Rotterdam and Houston.
18. Half of the top 10 chemical companies in the world will be Asian or Middle Eastern companies.
35. Singapore is the 18th largest exporter of oil in the world despite not having a single drop of oil reserves, exporting 1.374 million barrels per day and importing 1.195 million barrels per day.
66. Singapore’s chemicals hub, Jurong Island, has successfully attracted investments in excess of S$50 billion.

From 2010 to 2030, sales in the chemical industry in Asia is expected to rise from 49% - 66%.

Our Graduates

Our graduates in Industrial Chemistry are employed all over the world, such as in Singapore (48.7%), Europe (33.9%), China (8.7%).

The most commonly accepted positions are Chemist, Research Engineer, Project Engineer, and Research Scientist.

TUM Asia has close relationships with many of its industry partners. Our graduates are expected to be able to find positions with many companies, such as BASF, Clariant, DELO and Exxon Mobil.
